

# Hub & Spoke System Grantee Profile: Riverside Treatment Center

The California Hub & Spoke System (CA H&SS) is a component of the California Medication Assisted Treatment (MAT) Expansion Project, and is being implemented as a way to improve, expand, and increase access to MAT services across the state. Each CA H&SS consists of a "Hub" that serves as the addiction center of expertise, and multiple "Spokes" that act as clinical service providers.

## About:

Riverside Treatment Center provides medication assisted treatment for individuals who are grappling with an addiction to opioids. Offering care for men and women aged 18 and older, the treatment center offers complete care that includes both medications and therapeutic interventions meant to assist men and women focus on their healing and recovery process. Riverside Treatment Center employs a team of physicians, counselors, and nurses who help patients begin their journey towards recovery.

## INNOVATIONS

**Telehealth:** Riverside Treatment Center is implementing telehealth services to further engage individuals with opioid use disorders in remote areas of the county. A web-based system to access educational and informational resources pertaining to available treatment options, and wellness and recovery initiatives for individuals who seek treatment will also be included.

**Media Campaign:** Media campaign efforts are aimed at increasing the scope and number of media stories featuring outreach and engagement success, and its impact by designing billboard space, signs on bus shelters, online advertising, as well as updating the website and creating a social media campaign aimed at informing patients of the MAT access of care.

A component of the media campaign is an online marketing initiative directed at educating Riverside and San Bernardino communities on the benefits of MAT services, as well as spreading awareness of available treatment options. The website includes information on the Spoke facilities, detailed information on MAT, as well as linking to the DHCS page for additional information on the program.

**Consumer Engagement:** Patients receive satisfaction surveys; feedback from the surveys, as well as patient advisory groups, are used to design innovative treatment strategies.
